

The Most Efficient Accounts Receivable Management Process for Oracle NetSuite

Overwhelmed by high volume of invoices?

Tired of manual processes?

Don't waste time across different tools managing your AR processes.

Kolleno will help you manage any invoice volume with ease and confidence. Delete spreadsheets and enter AI intelligence. Centralise and automate all AR collections, reconciliations and payments in one platform.

Key Features for Complex AR Processes

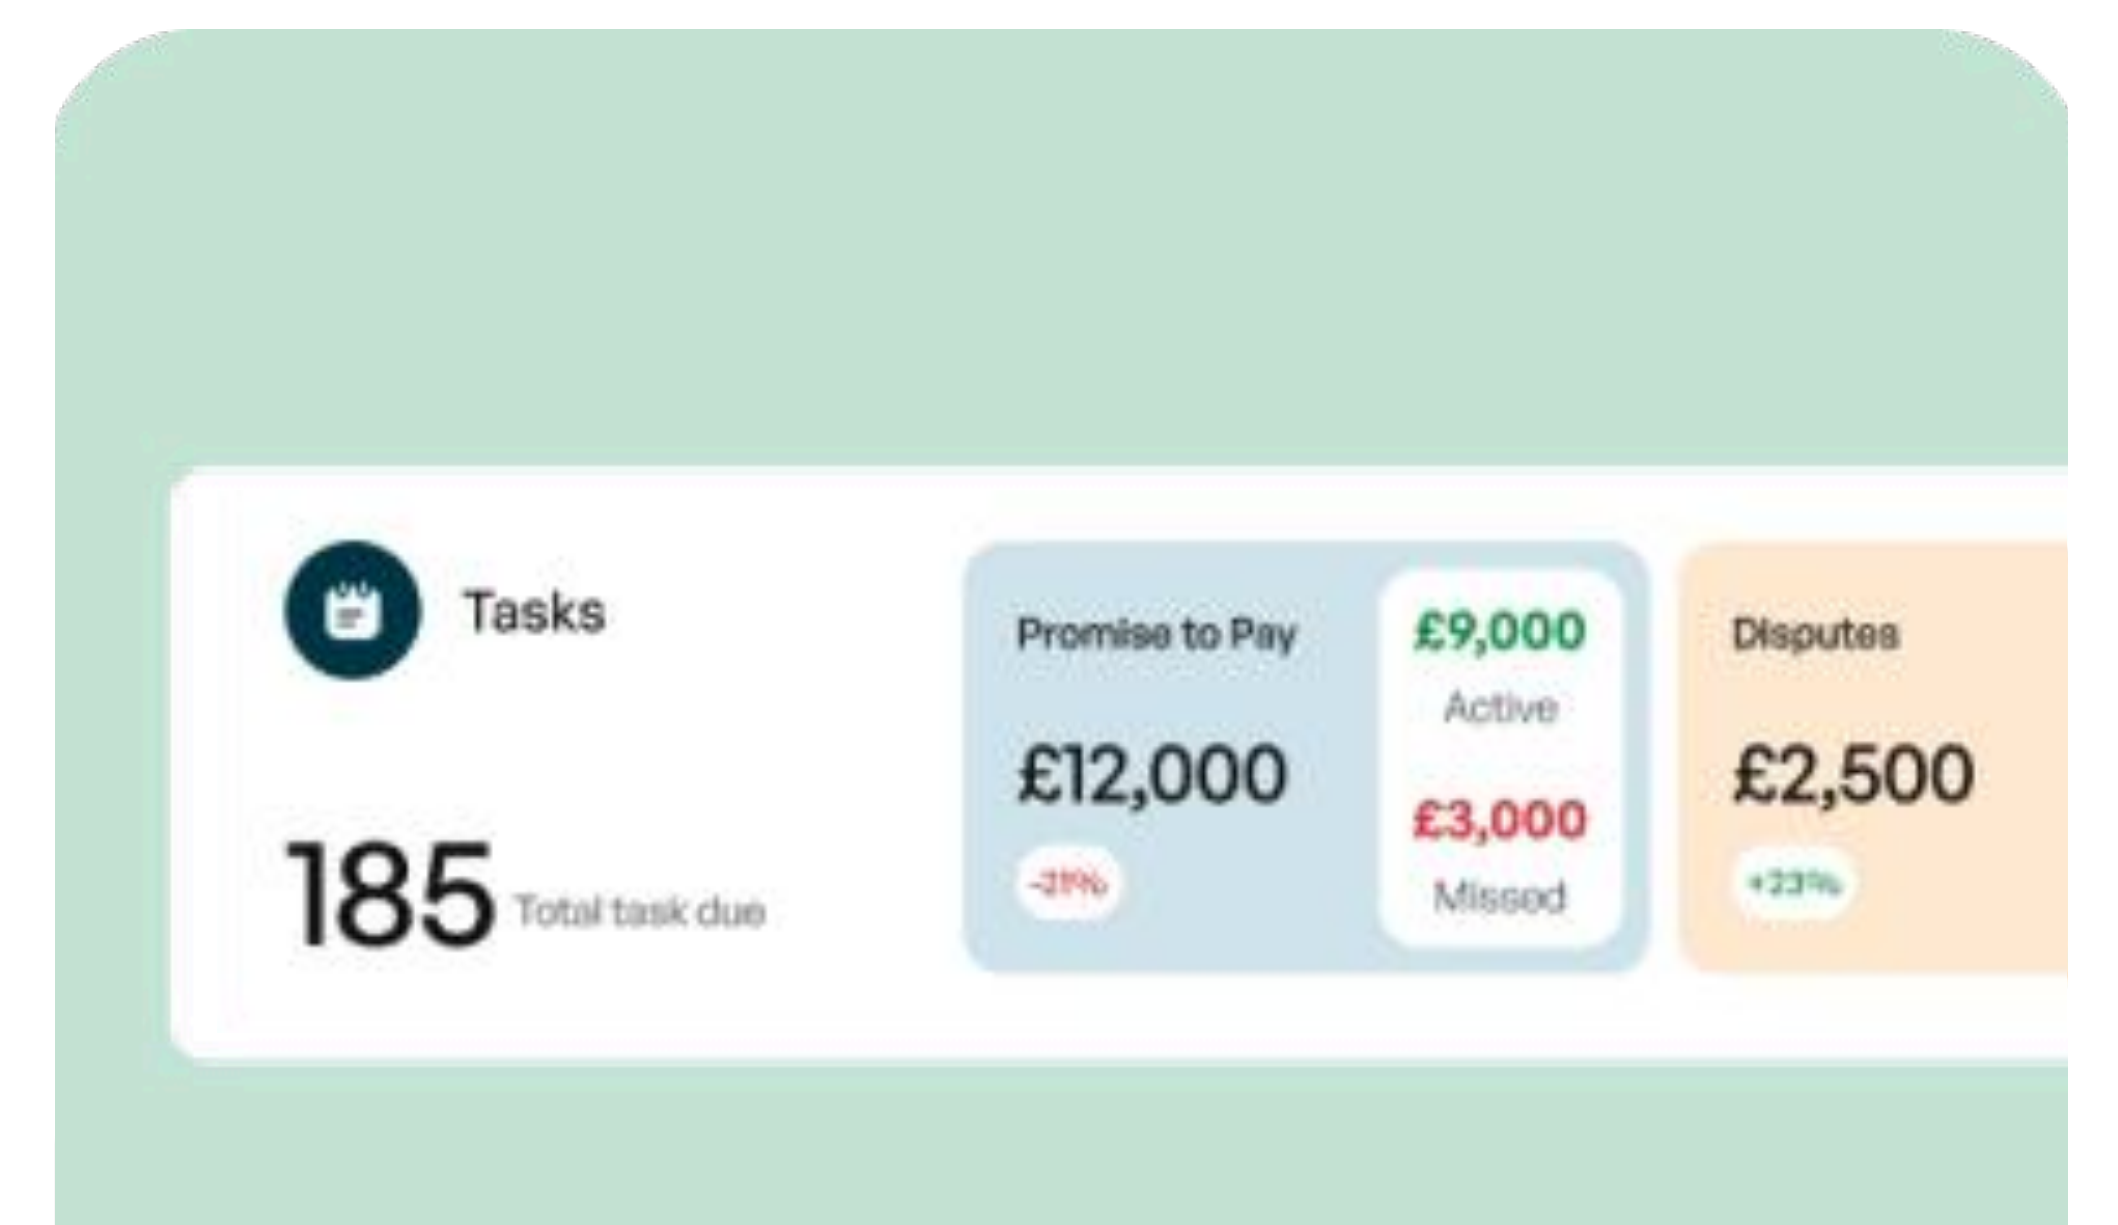

AI-Powered Dunning Workflows

Automate every step of your credit control & dunning process. Customize workflows based on credit profile, outstanding balance, days overdue and more.

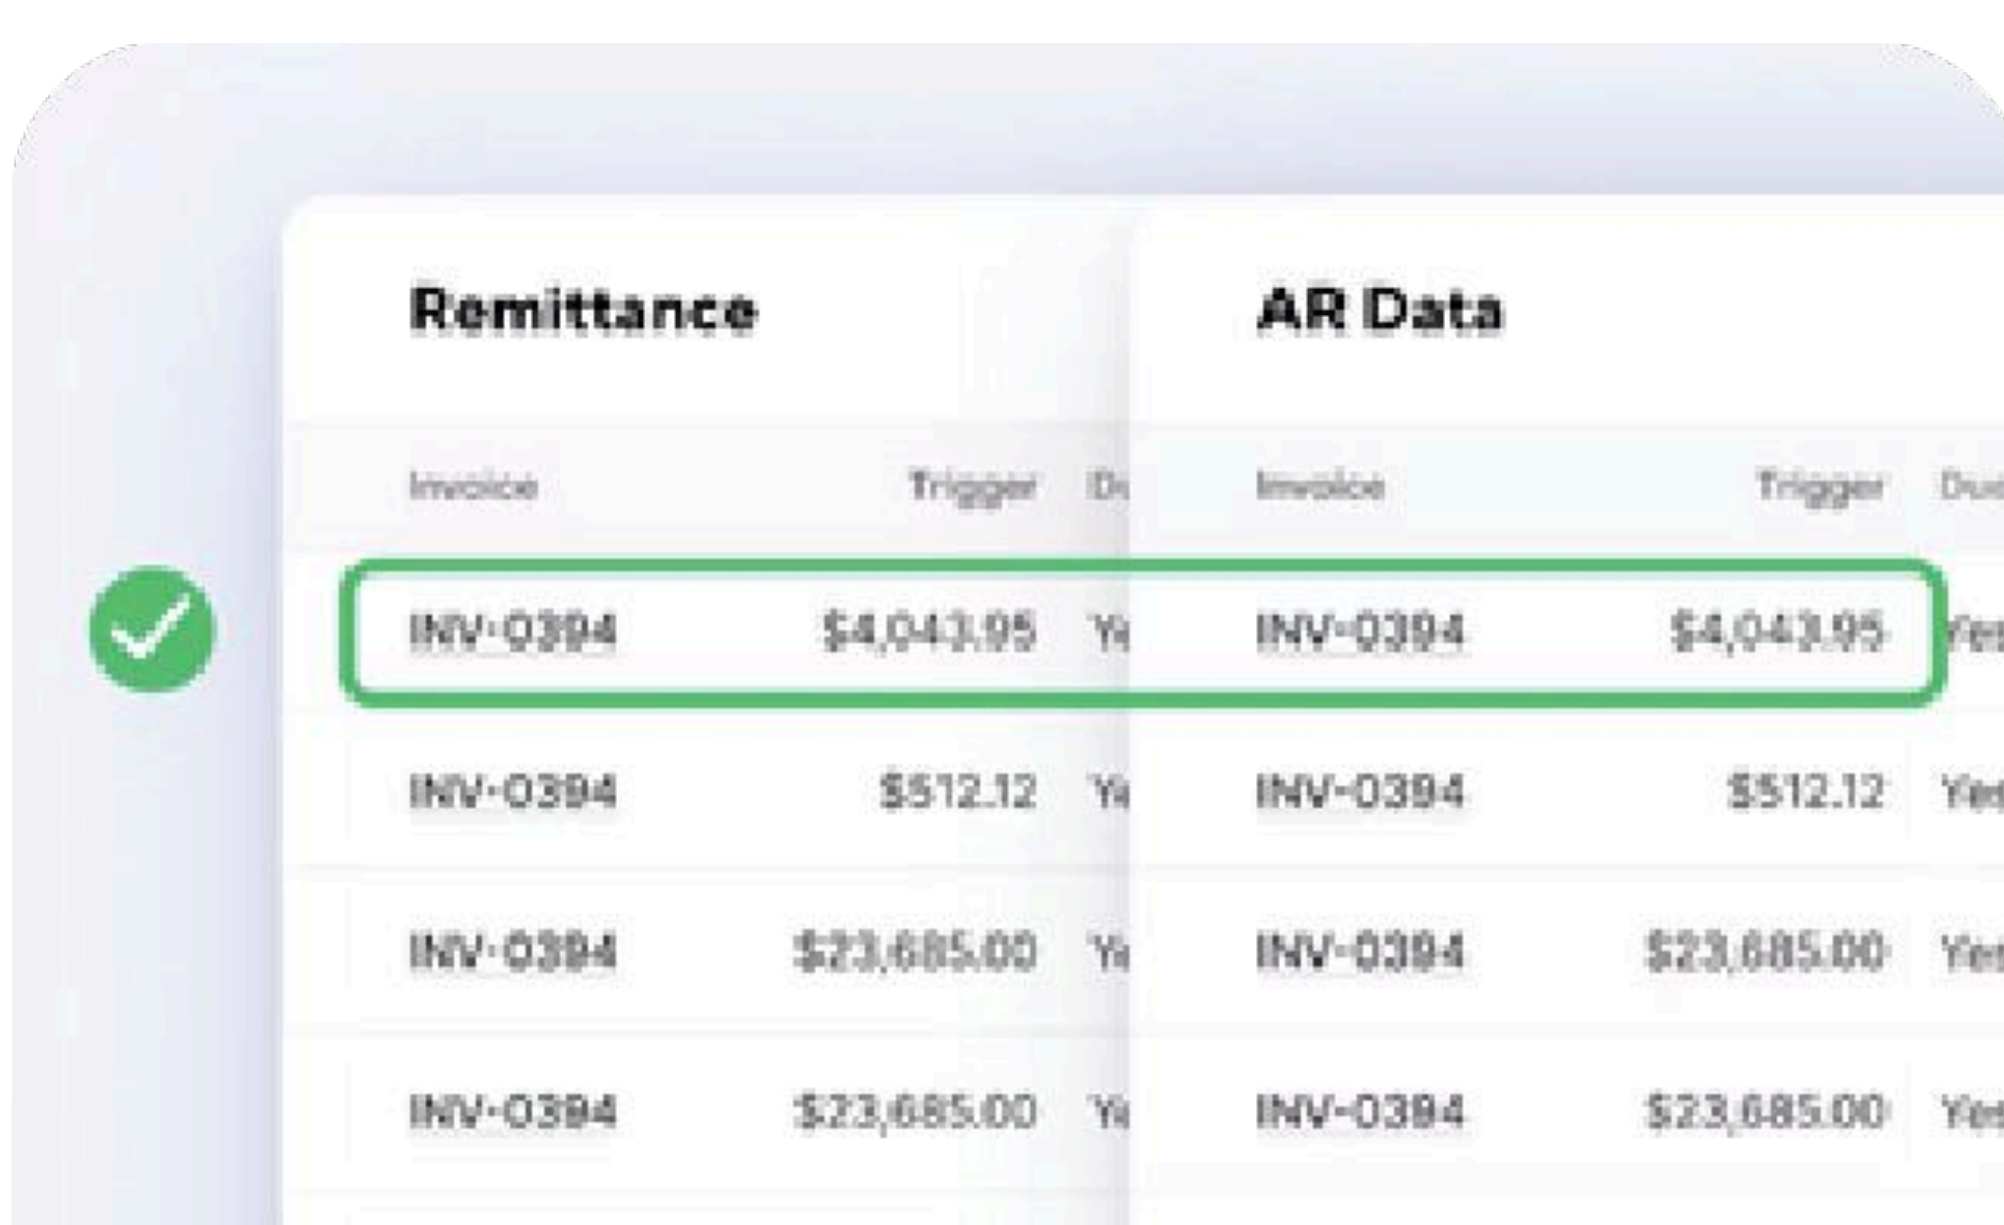

Customer-Focused Payments Portal

Clients have the flexibility to make both one-time and recurring payments through a variety of options, including direct debit, credit/debit cards, online payments, wire transfers, ACH, SEPA, and more.

Intelligent Task Manager for Your Team

Not the inbox you expected, but the one you need. Kolleno provides a clear to-do list for your daily operations, so you can easily focus on execution.

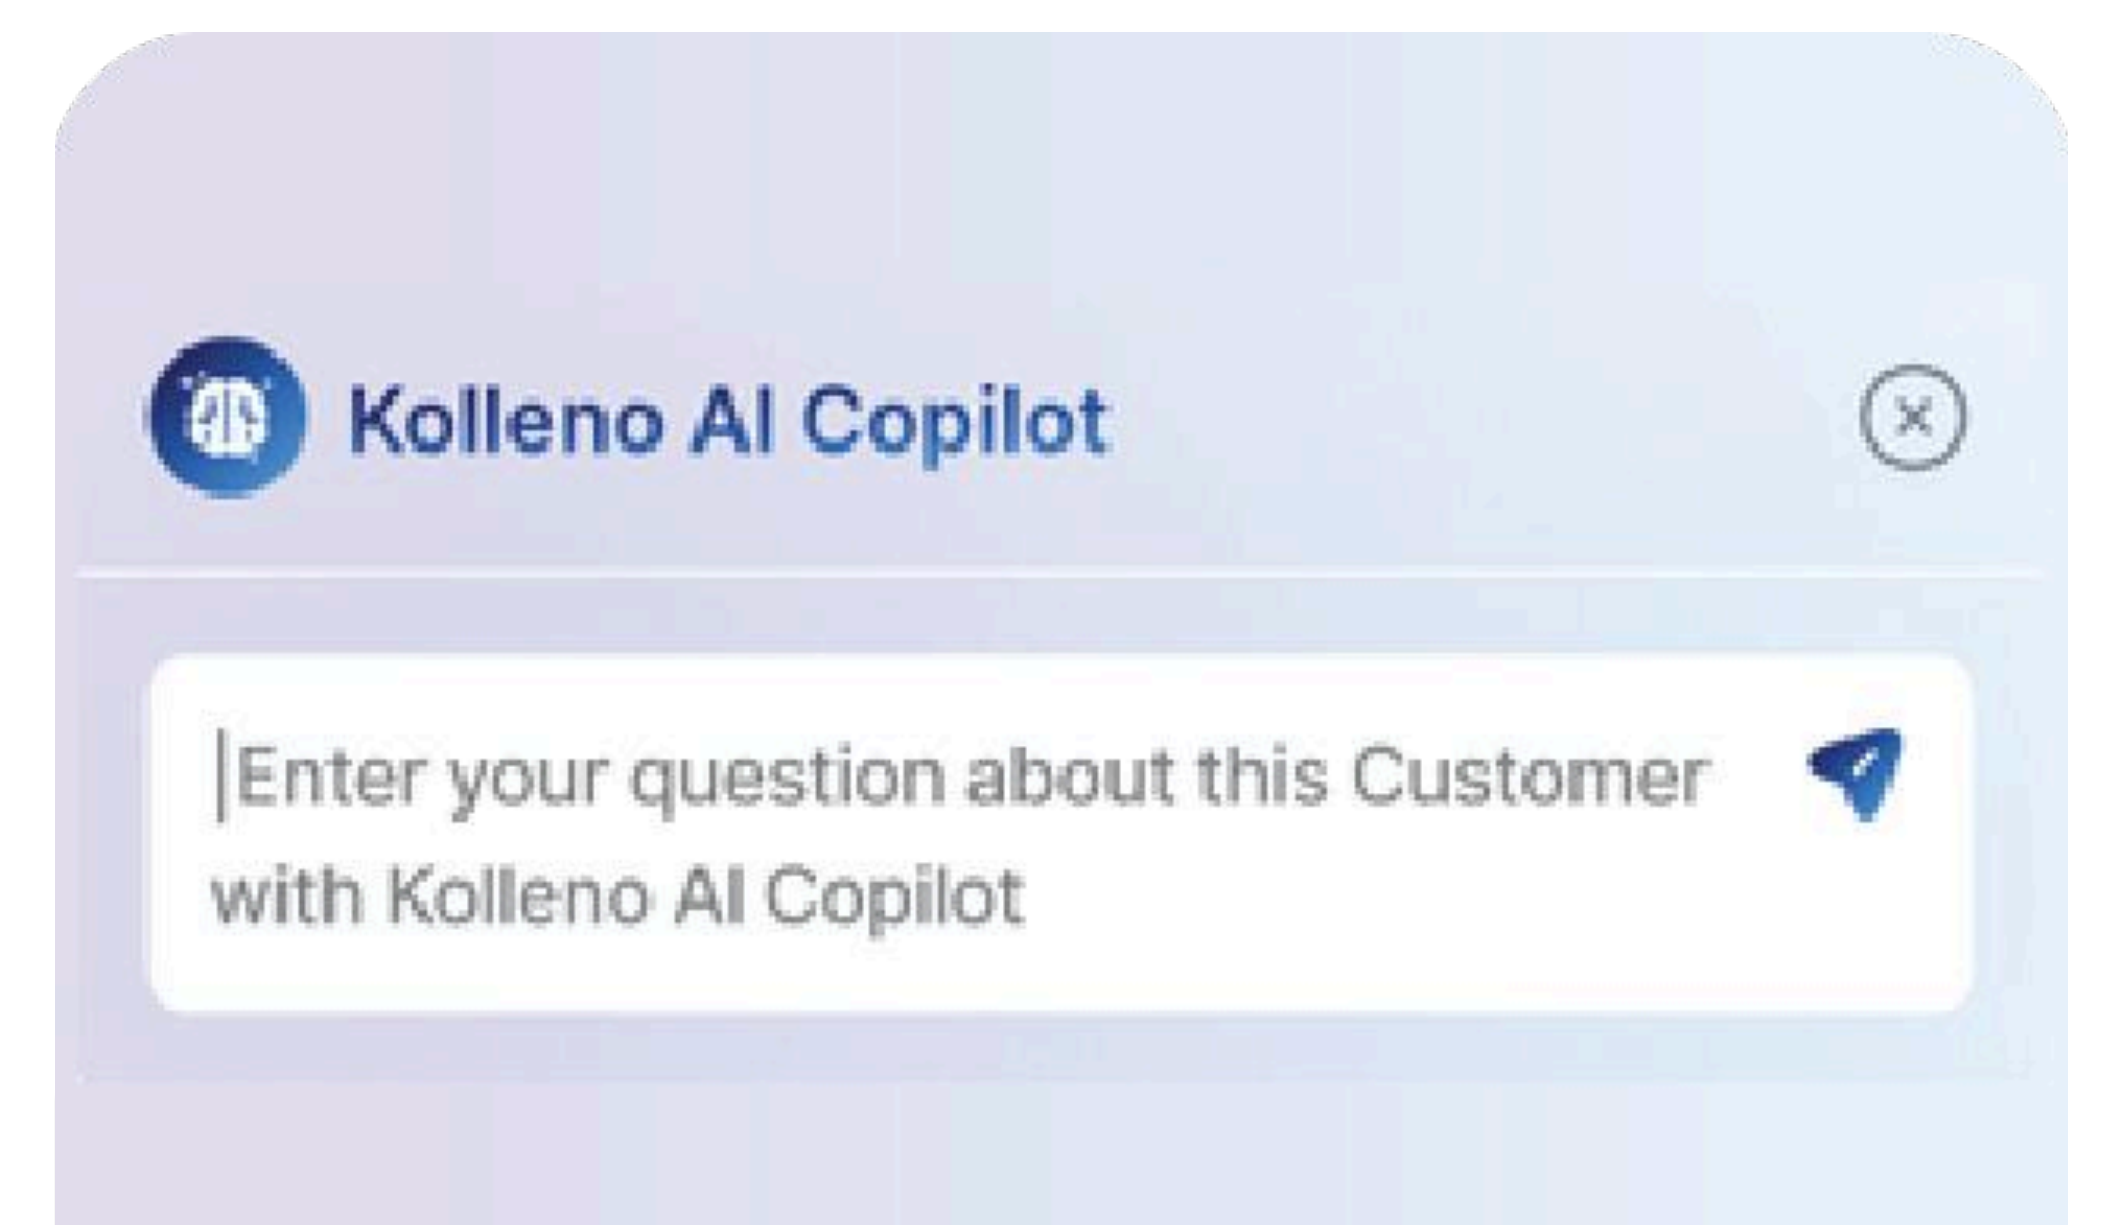

Reconciliation Automation for NetSuite

Kolleno will automatically reconcile payments to open invoices and apply payouts to undeposited cash in your NetSuite, matching the customer and invoice data in real-time.

Advanced Analytics and Reporting

Our reliable and error-free reports provide you with instant access to data and AI-driven recommendations, allowing for real time strategy adjustments and decision-making.

Kolleno AI Copilot

Kolleno AI autonomously handles day-to-day communications, finds the right information in one prompt and suggest the best course of action for collection strategy tailored to individual customer profiles.
